## 2.3 Feature File

```

1  Feature: Profilsettings
2      As a user
3      I want to change my account settings
4
5
6  Scenario: change Email
7      Given I visit the inaeternum website and log in
8      When I click on the link for Profilsettings on my Profil page
9      And I enter a "Lisa@example.com" into field having name "newemail"
10     And I click on element having name "save"
11     Then "newemail" should be update in database "users"
12     And I navigate to "Profil page"
13
14
15  Scenario: change Password correctly
16     Given I visit the inaeternum website and log in
17     When I click on the link for Profilsettings on my Profil page
18     And I enter "123456" into input field having name "password"
19     And I enter "987456" into input field having name "newpassword"
20     And I enter "987456" into input field having name "passwordwiederholung"
21     And I click on element having name "save"
22     Then input field having name "passwordwiederholung" and input field having name "newpassword" be similar
23     And I navigate to "Profil page"
24
25
26  Scenario: change Password fails
27     Given I visit the inaeternum website and log in
28     When I click on the link for Profilsettings on my Profil page
29     And I enter "123456" into input field having name "password"
30     And I enter "987654" into input field having name "newpassword"
31     And I enter "111236" into input field having name "passwordwiederholung"
32     And I click on element having name "save"
33     Then input field having name "passwordwiederholung" and input field having name "newpassword" not be similar
34     And I should see "Your first and second password are not similar. Please check it and press 'next' again."
35

```

## 3. Special Requirements

### 3.1 Usability

Because our target group are older people, we will make the profil management very user-friendly and self-explaining.

## 4. Preconditions

### 4.1 Login

A user must be logged in to change his profil settings.

### 4.2 Registration

A guest must finished registration to change his profil settings.
